

ADA protects people with Multiple Chemical
Sensitivity. GE food hurts MS people!
Dear FDA, I am writing to express my concern over the FDA's regulation of
genetically engineered (GE) food, to ask that the agency's current
policies be changed, and to support all the points in
docket # OOP-1211/CPI, specifically:

- All GE foods should be labeled so I am informed
and have a choice.
- GE foods should not be assumed to be "generally
recognized as safe" and should have mandatory
pre-market safety testing.
- There should be a moratorium on GE foods and
crops until long term studies show they are safe
for human health and the environment.

GE Food Moratorium
